Overview

What Is Prior Authorization?

Prior Authorization is a program that helps you get prescription drugs you need ***with safety, savings and—most importantly—your good health in mind.*** It helps you get the most from your healthcare dollars with ***prescription drugs that work well for you and that are covered by our pharmacy benefit.*** It also helps control the rising cost of prescription drugs for everyone in our plan.

The program monitors certain prescription drugs and their costs so you can get the right drug at the right cost. It works much like healthcare plans that approve certain medical procedures before they're done, to make sure you're getting tests you need: if you're prescribed certain medicine, that drug may need a "prior authorization." ***It makes sure you're getting a cost-effective drug that works for you.***

For instance, Prior Authorization ensures that covered drugs are used for treating medical problems rather than for other purposes.

Example: A medicine may be in the program because it treats a serious skin condition, but it could *also* be used for cosmetic purposes, such as reducing wrinkles. To make sure your medicine is used to treat a medical condition and promotes your health and wellness, our plan may cover it only when a doctor prescribes it for a medical problem.

In this program, ***your own medical professionals are consulted.*** When your pharmacist tells you that your prescription needs a "prior authorization," it simply means that more information is needed to see if our plan can cover the drug. Only your doctor (or sometimes a pharmacist) can provide this information and request a prior authorization.

Who decides what drugs to include in our Prior Authorization program?

Our plan has chosen a Prior Authorization program ***developed under the guidance and direction of independent, licensed doctors, pharmacists and other medical experts.*** Together with Express Scripts – which manages our pharmacy benefit plan – these experts review the most current research on thousands of drugs tested and approved by the U.S. Food & Drug Administration (FDA) as safe and effective. They recommend prescription drugs that are appropriate for a Prior Authorization program, ***and our organization's pharmacy benefit plan chooses the drugs that will be covered.***

What kinds of drugs need a prior authorization in our program?

The ones in our Prior Authorization program are

1. Drugs that our plan wants to make sure you need for a medical condition, and
2. Drugs that could be used for non-medical purposes.

Contact Express Scripts at 1-800-451-6245 for the most current information on drugs that need prior authorization.

How Prior Authorization Works

Why couldn't I get my original prescription filled at the pharmacy?

Here's what occurs when a prescription drug needs a prior authorization:

When you hand in your prescription, your pharmacist sees a note on the computer system indicating "prior authorization required." Your pharmacist lets you know that your prescription needs a prior authorization—which simply means that ***more information is needed to determine if your plan can cover the drug.***

If my doctor wrote my prescription prior to January 1, 2010 will that prescription be subject to prior authorization?

If you have a prescription that was written prior to January 1, 2010, we will grandfather that prescription until it is finished. Once that prescription is finished, if your doctor writes a new prescription it will be subject to the prior authorization program.

How can I get my prescription filled under the Prior Authorization program?

You can ask your doctor to call Express Scripts – the company chosen to manage our pharmacy benefit. Only your doctor (or sometimes a pharmacist who knows your history) can give Express Scripts the information needed to see if your drug can be covered. Express Scripts' Prior Authorization phone lines are open 24 hours a day, seven days a week, so a determination can be made right away.

If your doctor (or pharmacist) calls for a prior authorization, an Express Scripts licensed pharmacist will

- check our plan's guidelines to see if your prescription drug can be covered, **and**
- note whether your plan will cover the drug only when it's used for treating specific medical conditions, rather than for other purposes.

Your doctor or pharmacist will be asked questions about your specific condition. If the information provided meets our plan's requirements, you pay the plan's copayment at the pharmacy.

OR you can ask your doctor if you could use another medication that's covered by our plan.

OR you can pay full price for the prescription at your pharmacy.

I need a prescription filled immediately. What can I do?

At the pharmacy, your pharmacist may tell you that your drug requires prior authorization. If this occurs and you need your medication quickly, you can:

- **Talk with your pharmacist about filling a small supply** of your prescription right away. You may have to pay full price for this drug.
- Then, **ask your pharmacist to contact your doctor**. Your doctor needs to call the Express Scripts Prior Authorization department to find out if this drug can be covered by our plan. Only your doctor (or in some cases, your pharmacist) can provide the information needed to make this determination.

Does this program deny me the medicine I need?

No, the program can help you get an effective medicine to treat your condition. Through Prior Authorization, you can **receive the right prescription drug for you that is covered by our benefits**.

If it's determined that our plan doesn't cover the medicine you were prescribed, you can ask your doctor about getting another drug that *is* covered. You'll receive it for our plan's copayment. Or, you can get the original prescription filled at your pharmacy by paying the full price.

What happens if my doctor's request for prior authorization is denied?

Our pharmacy benefit plan doesn't cover certain drugs. You can contact Express Scripts at 1-800-451-6245 for information on filing an appeal.

I filed an appeal and it was denied. What can I do?

There are two things you can do:

- You can talk with your doctor again about prescribing one of the drugs that are covered by our plan. Your copayment will usually be affordable for one of these drugs.
- OR**
- You can pay the full price of a drug that isn't covered by our plan.

Mail Service and Prior Authorization

I sent in a prescription for mail-order delivery, but I was contacted and told it needs a prior authorization. What happens now?

The Express Scripts Mail Service Pharmacy will try to contact your doctor. You may want to call your doctor to let him/her know that this call will be coming. If your doctor thinks you need this drug for your condition, he/she can talk with the Mail Service Pharmacy representative about a prior authorization.
